Site Description

The Site is an abandoned specialty chemical manufacturing facility located in West Helena, Arkansas which was abandoned in a bankruptcy court action on October 18, 2002. The facility is located on 48 acres and consists of six (6) separate processing units, laboratories, a finished goods warehouse, a stormwater pond, a wastewater treatment plant, and other administrative and operational buildings.

The environmental issues associated with the Site include abandoned chemicals, potentially buried drums, a constructed drum vault filled with unknown chemicals, ground water contamination, surface and subsurface soil contamination, and an abandoned stormwater and wastewater treatment system.

Current Activities

The EPA mobilized its START Contractor to the Site on 7/16/03 to conduct an inventory of chemicals, hazcat unknowns, and segregate the laboratory chemicals in the proper disposal classification.

The EPA mobilized its ERRS Contractor on 7/28/03 to begin evacuating chemicals from tanks, equipment, and piping; and, disposal of all chemicals.

The EPA Response Activities were completed and the site demobilized on 10/06/2003.

Planned Removal Actions

The removal actions included the removal and disposal of the abandoned chemicals in the laboratory, chemicals located in the warehouses, other miscellaneous chemicals located on the facility, and those chemicals located within tanks, equipment, and piping.

Next Steps

No further EPA actions are anticipated at this site.

Key Issues

The EPA left some drums of oil and acids that the ADEQ determined would be necessary for their continuing activities on the site. These materials were left in the warehouse.

Estimated Costs *

	Budgeted	Total To Date	Remaining	% Remaining
Extramural Costs				
Intramural Costs				
Total Site Costs	\$0.00	\$0.00	\$0.00	0.00%

* The above accounting of expenditures is an estimate based on figures known to the OSC at the time this report was written. The OSC does not necessarily receive specific figures on final payments made to any contractor(s). Other financial data which the OSC must rely upon may not be entirely up-to-date. The cost accounting provided in this report does not necessarily represent an exact monetary figure which the government may include in any claim for cost recovery.
